April 2026

Dear Admissions Committee,

My name is Anthony Virjin, and I am a high school student applying to pursue a degree in Computer Science and/or Forensic Science. Those who know me best would describe me as patient, determined, and principled — qualities that guide how I approach both my academics and my personal life.

I have built a foundation in web development and version control through hands-on experience with HTML, CSS, Markdown, Git, GitHub, and Visual Studio Code. Outside the classroom, I have been involved with Ctel throughout all four years of high school and completed over 60 hours of volunteer service at a local thrift store, where I helped organize inventory and assess donated technology.

My primary goal is to become a digital forensic analyst, a career that brings together my love of technology and my commitment to justice. I plan to apply to Fresno State, San Jose State, and Cal State Bakersfield, where I look forward to growing both academically and professionally.

Thank you for your time and consideration. I am excited about the opportunity to contribute to a college community and would welcome the chance to discuss my background further.

Respectfully,

Anthony X Virjin
